# 'Online issues and worries'

This week the Welsh Government has launched a new '[Online issues and worries](#)' area on Hwb specifically for children and young people. This new area includes information and advice on 10 different online safety topics, including online bullying, sharing nudes and online gaming. The new feature has been shaped by Welsh Government research into children and young people's online experiences and worries and some of the barriers to getting help.

The advice is designed to help children and young people understand more about online safety and offer guidance on what to do and where to turn for help if they are worried about something online.

Please help us to raise awareness of '[Online issues and worries](#)' area among children and young people so that they are supported to become digitally resilient and are empowered to deal with problems they may encounter online safely.

# Advice for children and young people:

## online issues and worries

There are lots of great things about social media, apps and games, life wouldn't be the same without them for most of us. But sometimes things can go wrong and you might feel like you are in an unsafe or upsetting situation.

We all want to keep our online experience positive so this area has been created to help you make sense of some of the issues that you might have to deal with. The information pages also include advice on what to do and where to turn for help if you are worried about something online.

Always keep in mind that you have rights and these rights also apply in the digital world!

# In the know - the latest on apps, social media and games for families

For young people, technology is central to everything they do. From connecting with friends on social media, to playing with other gamers from around the world on different multiplayer gaming platforms. For parents and carers, understanding this engagement with digital technology can be overwhelming and it can be difficult to establish boundaries.

The 'In the Know' project has been designed and created especially with parents and carers in mind, to equip them with the key information that they need to help young people embark on their digital journeys safely.

The collection of guides covers what all parents and carers should know about the most popular social media and gaming apps children are using today.

Each guide includes a detailed overview of the app, outlining the age rating and key terminology parents and carers should know. The guide also highlights the risks each app poses to young people and gives detailed instructions on how to enable parental controls and safety settings.
